Certification good for 5 years

ACI Adhesive Anchor Certification

Review Class and Written Test

Workbook and Study Guide

Written Test

75 multiple-choice questions

90-minutes

Performance Test Part 1 (vertical down)

Selecting, assembling and using the proper tools, equipment and materials to drill and clean a vertical down hole in concrete, inject adhesive, and set an anchor to the proper depth and perpendicularity.

Performance Test Part 2 (vertical up)

Inject clear tubes with adhesive in a vertical up orientation behind a blind to simulate a drilled hole in concrete.

ACI Adhesive Anchor Certification

Program offered by three ACI Local Sponsoring Groups in Pennsylvania
